

Project *Wesley Close – Japanese Knotweed Remediation*

Developer *Herbert H Drew*

PBA's Role PBA Solutions have provided Japanese knotweed management services as an advisor to a design and build contractor using the most cost effective Japanese knotweed remediation solutions. PBA arranged for Japanese knotweed material to be taken off site while the main contractor provided machines and lorries. PBA completed herbicide treatments, installed a specialist Bioroot-barrier and managed all construction works which are in contact with land impacted by Japanese knotweed.

Work involved capping Japanese knotweed contaminated land using our specialist Bioroot-barrier which needed to be bonded and sealed to both new and existing structures. On site monitoring to ensure the remediation works remain effective has been agreed and is part of the contract.

Value Circa £15,000

Date Completed Summer 2012

Japanese Knotweed Removal and Treatment - Mortgage Compliance - Insurance Backed Guarantees - Root Barrier Sales and Installation
